

At Arup we undertake our operations in a commercially, socially and environmentally sustainable manner, to provide our clients with 'value added', integrated and sustainable design solutions.

To achieve our corporate sustainability objectives Arup commits to:

In our office facilities and consultancy services:

- Co-ordinate all our activities to meet the requirements and intent of relevant National and European Union environmental legislation, standards and to comply with other requirements to which we subscribe relating to our environmental aspects.
- Base our business decisions on the principles of Sustainable Development.
- Endeavour to prevent pollution and minimise the adverse impact of our activities on the environment.
- Appoint a Champion to lead the sustainability drive within Arup.
- Ensure the continuing professional development of all our personnel, to improve their skills and awareness of environmental issues and best practice in sustainable design.
- Annually review and improve this policy, communicate it to staff, and make it available to clients, sub-consultants, contractors and members of the public on request.

- Manage our office operations in a sustainable manner by minimising the use of non-renewable resources and the generation of waste, maximising the reuse and recycling of materials, managing energy usage responsibly and encouraging sustainable transport use.

In our consultancy services:

- Seek ways to use our skills and influence to improve the built environment and to maintain and improve the integrity and quality of the natural and cultural environments by conducting project environmental reviews.
- Direct these skills to maximise the sustainability of new developments.
- Work with others (clients, fellow service providers, suppliers, decision-makers and professional bodies) to raise environmental and sustainable design standards where we have the opportunity to influence decisions.
- Develop and enhance the Arup reputation for effective and sound advice to clients on environmental and other sustainable design issues.

Environmental and Sustainability Policy

Arup, founded by Ove Arup in 1946, is one of the largest consulting engineering practices in Ireland with more than 400 personnel, and is part of the global Arup Partnership. We provide a full range of engineering services in our offices in Dublin, Cork, Limerick and Galway.

In line with our founder's original vision for the company, at Arup we undertake our operations in a commercially, socially and environmentally sustainable manner, to provide our clients with 'value added', integrated and sustainable design solutions.

Arup is committed to continual improvement in all aspects of our activities including environmental and sustainability performance. This is achieved through the implementation of our Environmental Management System (EMS).

Our EMS is ISO 14001 accredited in our Dublin, Cork and Limerick offices with the scope including both the environmental management of our office facilities and our design and consultancy services.

Arup already operates a Quality Management System (ISO 9001) and integrates these management systems in an efficient and effective manner.

This policy reflects the high priority given to sustainability within Arup Consulting Engineers.

Jerry Mehigan
Chairman and Managing Director
